BIKASH KUMAR THAKUR

+91 9508644616 | kumarvikash06182@gmail.com | LinkedIn | GitHub | Portfolio | Play Store

SUMMARY

Software engineer and 2026 B.Tech graduate with production experience building and shipping cross-platform Flutter applications for Android and iOS. Comfortable across the stack: REST API integration, authentication flows, and backend services in Python (Django, FastAPI) and Node.js, with Firebase and SQL data layers. Published apps on the Google Play Store.

TECHNICAL SKILLS

Languages: Python, Dart, Java, JavaScript, SQL
Mobile: Flutter, Android, iOS, Cross-Platform Development, Google Play Store Deployment
Backend: Django, FastAPI, Node.js, REST APIs, Authentication, Firebase (Auth, Firestore, Storage)
Frontend: React, HTML, CSS
Data & ML: Pandas, NumPy, Matplotlib, scikit-learn, Power BI
Tools: Git, GitHub, VS Code, Vercel, Cloudflare
Foundations: Data Structures & Algorithms, Object-Oriented Programming, Agile, Code Review

EXPERIENCE

Full Stack Developer July 2025 - June 2026
Klayons

- Built and maintained production Flutter applications shipped to both Android and iOS from a single codebase.
- Integrated RESTful APIs and implemented end-to-end authentication flows, including session handling and token refresh.
- Delivered subscription management, user onboarding, event management, and dashboard features used in production.
- Profiled and optimized app performance, reducing UI jank and startup latency on lower-end Android devices.
- Collaborated with backend engineers and reviewed pull requests using Git branching workflows.

Full Stack Developer (Freelance) 2025
AsRES - Event Management App | Client: University of Melbourne link

- Designed and shipped a cross-platform event management application in Flutter (Dart) targeting mobile and web from one codebase.
- Architected the backend on Firebase using Authentication, Firestore, and Cloud Storage.
- Implemented role-based access control with distinct interfaces for Attendees (schedule, speakers, venue) and Organizers (check-in control, session and speaker management, bulk import/export).
- Delivered and handed off a complete production solution serving both mobile and web users.

Data Analytics Intern June 2024 - August 2024
IBM SkillsBuild

- Analyzed large datasets to identify patterns and trends, translating findings into actionable business recommendations.
- Built analysis pipelines using NumPy, Pandas, and Matplotlib.
- Applied supervised and unsupervised machine learning models with scikit-learn.
- Authored technical documentation to support knowledge sharing across the team.

PROJECTS

Wingmail link
Technologies: Flutter, Node.js, Firebase, Cloudflare, Vercel

- Built a messaging application in which a letter travels the real geographic distance between sender and recipient, arriving only after that journey completes.
- Implemented geolocation-based delivery scheduling so transit time is a function of physical distance rather than network speed.
- Deployed to the Google Play Store with a Node.js service layer behind Cloudflare and Vercel.

EDUCATION

Guru Gobind Singh Indraprastha University, Delhi 2022 - 2026
Bachelor of Technology, Industrial Internet of Things | CGPA: 7.87 / 10

Kendriya Vidyalaya, Muzaffarpur 2019 - 2021
Senior Secondary (Science) | 78.3%

ACHIEVEMENTS

- **2nd Prize, Hardware Hackathon** - Guru Gobind Singh Indraprastha University EDC. link
- **Smart India Hackathon 2024** - selected for the internal hackathon round.
- **Treasurer, CSR College Club** - managed club finances and event planning.

CERTIFICATIONS

- Data Analytics Internship Certificate - IBM
- Project Management Fundamentals - IBM
- Data Fundamentals - IBM
- SQL Certificate - Simplilearn
